

Digital-ABB Sample Audit Report

Our Health & Hygiene Audit provides the data-driven insights needed to support infrastructure reliability, warranty requirements, and audit readiness.

What's inside the report:

Real-time Particle Counts: Laser-scanned PM2.5 and PM10 levels compared against ISO Class 8 environmental benchmarks.

Invisible Risk Assessment: Identification of airflow restrictions, dust accumulation patterns, and environmental factors that may impact system cooling performance.

Compliance Alignment: Documentation structured to support facility reviews aligned with NFPA 75 and manufacturer environmental expectations.

Actionable Recommendations: Clear, prioritized steps to improve airflow conditions, reduce contamination risk, and maintain physical-layer stability.
